Office 25 & 27 Fourteenth Street.

FREW & CAMPBELL.

WEDNESDAY, APRIL 11, 1877.1

THE POPE'S LAST ALLOCUTION -- OUT esteemed cotemporary, the Freeman's Journal, the paper that took the INTEL-LIGHTCH to task so severely for its re-Evision to task so severely for its remarks on the poor Canada heretic whose resing piace was cursed by the Montreal prelate, favors the public with a copy in fall of the Pope's allocation to the Cardinals on the 12th of March. This remarkable paper proves to have been of greater consequence than has been represented in the letters of correspondents at Rome. It was a long, eloquent and vigorous address, recapitulating all the measures taken against the church by the Italian government; declaring them all directed against the church by the Italian government; declaring them all directed against the church by the Italian government; declaring them all directed against the church's very existence explaining the Pope's recent consent to submit it under protest to the law requiring Bishops to acknowledge the temporal power; reiterating his unalterable position that the Boman potifi can only remain in Rome as a sovereign or a prisoner; and yet expressing hope of brighter days, because of the manifestations of love and sympainly from the faithful in all marks on the poor Canada heretic whose manifestations of love and sympathy from the faithful in all manifestations of love and sympathy from the faithful in all
parts of the earth. Concerning the
law on clerical abuses, which has since
passed the Italian Parliament, the Pope
was especially emphatic. This law is
aimed at the priests and bishops who,
the Pope and it wonester it is to present the passed of the priests and bishops who,
the Pope and it wonester it is to present the properties of country. It is estimated that between 75,000,000 and 100,matter than the Pope of the priests and bishops who,
mated that between 75,000,000 and 100,mated that between 15,000,000 and 100,ossession of his full and genuine freen," rests, as we have noted, on the in-

ong the existence of a communant this season.

Custom-House officials and importers this season. The impression appears to who have been successful in dodging tariff duties on silk to the amount of from \$10,000,000 to \$15,000,000 a year. By some means not yet fully developed, this combination of conspirators have been able to import and sell silks at prices below the cost of manufacture with the duty added, so that a house like that of A. T.

Stewart & Co. sithbourh operating its Stewart & Co., although operating its own factories in France, is unable to imown factories in France, is unable to import the goods of its own manufacture and compete with the prevailing market dis. M. Eatchelor, aged 69 years, II month rates, but socually buys these identical ! fabrics, which have been sold in Europe and smuggled into New York. Just how this could be done, A. T. S. & Co. have been unable to understand, and that is what the Treasury officers are engaged in trying to find out.

The Lack of Thoroughness in the Public Schools.

All over the country the public schools are receiving considerable attention by way of discussion. The general complaint seems to be, too much undertaken, too little accomplished. In many cases, and by high authority, we see it stated that anything like thoroughness in reading, spelling and arithmetic is out of the question. Writing is already one of the lost arts in our schools. History, drawing, sketching, painting, Latin, Greek and German are put upon the scholar at an On the lack of thoroughness in the ele

mentary branches, the Cincinnati Com-mercial recently had the following:

"The statistics given by Professor Church, of West Point, based upon the Canreh, of West Point, based upon the examinations of the candidates for admission to the Milliary Academy for a portion of nearly forty years, are quoted in support of the assertion. Thus, to summarize these figures, we find that, in 1840, out of one hundred and six candidates, eight failed on examination; in 1850, out of eight-four, twelve failed; in 1850, out of eight-four, twelve failed; in 1870, cut of one hundred and sixy-eight, eventy-three failed; and in 1874, out of one hundred and sixy-eight, eventy-three failed; and represent nearly all the classes of society. The standard of examination in reading and writing has not been materially changed af West Point. The later examinations, however, have, according to the Professor, been more strict. In reply to inquiries provoked by the statistics, Professor Church writes:

'I should say that the opinion I have so emphatically expressed (as to the deterioration of the school training of candidates) is not founded alone upon the knowledge exhibited by those who have, after admission, come at once under my personal instructions.

Although the Board of Examiners have called public attention to the steady that the called public attent

Although the Board of Examiners have called public attention to the steady deterioration in thoroughness of rudimentary education, it has not checked the tendency downward. In proof of this Prof. Church says:

'I may instance the facts that the num If may instance the facts that the number rejected as poor readers is now and always has been small; yet it is observable that the proportion of intelligent readers is much smaller than formerly. In spelling, the examination has always been strict, and, as near as we can make it, our standard the same; yet more are rejected and more ordinary spellers are found among those admitted. In arithmetic, likewise, with the same standard of attainment, as far as my long experience can make it, while the proportion rejected has increased I find as well in those admitted less accuracy in definitions and rules, less ability to give clear reasons, and less facility in the application of the principles whenever required in other branches of their mathematical course."

In the report of the Examining Board

for 1875, we find these remarks "It is a very suggestive fact that in the last fire years the average number of re-jected candidates has been six per cent for the physical deficiency, and forty per cent in the scalastic requirements. In the six New England States, where eduthe six New England States, where edu-cational facilities are open to all, the re-jections have been thirty-five per cent of common facilities in shore and six HEILLY.

the number examined from that section. From these statistics it is clearly evident that in the schools of the country there is need of more thorough methods of in-struction in the elementary branches."

LUMBER.

The Business in Pennsylvania: Lock HAVEN, PA., April 3.—The prospects of the lumber-business of Pennsylvania this year are very promising. From all the lumber regions—particularly those of the Susquehanna, Delaware and Lehigh Valleys—come the good tidings of a lively and prosperous spring opening of this great and important interest of the Kevatone State.

Keystone State.
The lumbermen of the Susquehanna

aimed at the priests and bishops who, as the Pope put it, "consider it incumbent upon them to point out and disapprove of law, decrees or other acts of civil authority as contrary to religion or to the laws of God and of His Church," and is pisinly a law dictated by the duty of self-preservation on the part of the state, as it is opposed by the same necessity on the part of the church. The Pope recognizes this law as equally aimed at him, who, exempted from penalties for political reasons, is thus punished through his ministers, as indeed had been avowed by a member of the Italian Miosirry in the Chamber of Deputies.

The necessities Pope it, "consider it incuments of the control of the church and the control of the church and the control of the church are presentative lumberment, the writer furnishes the following: Holbert & Branning have got out 8,000,000 feet and been avowed by a member of the Italian Miosirry in the Chamber of Deputies.

The necessities Populify house that the chamber of Deputies, the sections of the Lackawanna river and Operations on the Lackawanna river and Operations on the Lackawanna river and Operations on the Lackawanna river and Operations of the chamber of Deputies, the chamber of Deputies, the chamber of the Italian Miosirry in the Chamber of Deputies.

The necessities Pope is the chamber of the recombination of the Lackawanna river and Operations on the Lackawanna river and Operations on the Lackawanna river and Operations of the chamber of the Italian Miosirry in the Chamber of Deputies.

The recompliance of Deputies are chamber of the section of the control of the chamber of the Italian Miosirry in the Chamber of Deputies. Ministry in the Chamber of Deputies.

The weverable Pontiff's hope that the lay will come "when the Pastor of the act business prompily and satisfactorily, Universal Church will be restored to the measurement of the first processes of this full and compine from the state of the control of of the industry.

The lumber business identified with the

dom," rests, as we have noted, on the interest that Catholics everywhere feel in
is fate; but he expects this interest to
result in appeals to the rulers of all
countries, which shall induce them to
interfere in bahalf of the Papary. And
he urges prayer to that end.

The operations of a mammouth Silk
Eing in New York City are undergoing
investigation with the result of establishing the existence of a combination of
Custom-House officials and importers
